

# Silicone Rubber

Product Name: Silicone Rubber

CAS No.: 63394-02-5

Product Standard: Q/HSGY 005-2021

Appearance: Milky White/ Translucent

## Properties and Uses

Mainly used for water-proof, moisture proof and sealing elements in the area of electronics, high temperature electrical wire and cable, and aviation and so on. It can be used to manufacture various kinds of silicone products, such as sealing components, sealing rings, keypads, molds, etc.

## Technological Index:

Item	Index
Hardness /Shore A	20~90
Tensile Strength /Mpa $\geq$	3
Tear Strength /(kN/m) $\geq$	10
Elongation /% $\geq$	100
Tensile Set /% $\leq$	10
Rebound /%	35~80

Note: Other specifications according to contract. It can be customized according to the requirements.

## Package, Storage and Handling

Plastic-lined paper box, net weight 20kg/-carton. Storage at ventilate and dry place and prevention from water, heat and fire. Keep away from alkalis and acids substances and lead. It is non-hazardous substance. Be careful when loading and unloading to avoid damages of the package. During transporting, protect against damp, water, acid and alkali.
